Group Assessment Contribution Form

Course: COS30049 – Computing Technology Innovation Project

Project/Assignment Title: Comprehensive Project Management Plan for the Innovation Project

Group Number: Group 10

1. Group Members:

Please list down all members of the group, including yourself:

1. **Name:** Livinggkumar A/L Supramaniam **Student ID:** 105960484
2. **Name:** Lalmuanpuia **Student ID:** 105735572
3. **Name:** Jean-Luc William Clovis **Student ID:** 105948781
4. **Name:** Teh Zhi Xiang **Student ID:** 105965557

2. Team Task & Contribution Log

To be completed and signed by all group members. This section documents the specific tasks each member was responsible for and provides evidence of their work. All members must reach a consensus on the described contributions.

- Example: " Design: The user login and registration pages using Figma."
- Example: " Documentation: The API endpoints for user authentication."
- Example: " Set up the project repository on GitHub. "

Group Member	**Tasks**
Member 1 (Lalmuanpuia)	**Data Engineering & Preprocessing:** Designed and implemented the data pipeline (data-processing.ipynb). Collected the raw NSW crash and ABS population datasets, handled LGA name mismatches, filtered out invalid/unknown records, and merged the datasets. Engineered the target variable (Severe_Crash) for classification and aggregated the data by LGA and year for clustering. **Exploratory Data Analysis (EDA):** Created and executed eda.ipynb to uncover data patterns. Designed visualizations for class balance, weather, road classification, seasons, and speed limits. Conducted statistical hypothesis testing (Chi-Square and Cramér's V) to measure feature associations. **Report Writing:** Authored the Introduction, Data Collection, Data Processing sections of the final report. **Final Compilation:** Organized the final submission structure (following the configuration document), prepared the README.md documentation, and compiled the final ZIP folder including all datasets, source code, models, and supporting documents.

Member 2 (Livinggkumar A/L Supramaniam)	**Visualisation:** Created the data visualisations for the report from the group's model outputs, including the clustering charts and classification charts. **Documentation:** Wrote the Problem Framing section, visualisation charts section in report. Recorded and organised the meeting minutes for Assignment 2 as well as prepare README (environment setup and instructions for running the chart scripts).
Member 3 (Teh Zhi Xiang)	**Classification:** Implemented Logistic Regression and Random Forest machine learning classification models based on our research questions. **Documentation:** Documenting my implementation of the classification models. Also wrote my part of the README. (Running classification model)
Member 4 (Jean-Luc William Clovis)	**Clustering:** Implement K-means and DBSCAN clustering models based on our research questions. **Documentation:** Documenting the implementation of the clustering models and conclusion. Also wrote my part of the README (Running clustering model)

3. Team Member Contributions:

As a group, discuss and evaluate the contributions of each team member in the table below. The final evaluations **must represent a consensus** agreed upon by the entire team.

Group Member	**Contribution (100% in total)**	**Quality of Work (1-5)**	**Timeliness (1-5)**	**Collaboration (1-5)**
Member 1 (Lalmuanpuia)	25%	4	4	5
Member 2 (Livinggkumar A/L Supramaniam)	25%	4	4	5
Member 3 (Teh Zhi Xiang)	25%	4	4	5
Member 4 (Jean-Luc William Clovis)	25%	4	4	5

Contribution and Grading Policy:

1. **Normal Grade:** Members contributing 33% or more will receive the full project mark.
2. **Penalty:** Members contributing less than 33% will incur a penalty. Their grade will be calculated as follows:
    - (Contribution Percentage/33)×Group Mark

    Example: If the total group mark is 15, and a member contributes 20%, their grade will be (20/33)×15 = 9
